Printed in Great Britain

Contents of Volume 70

Number 1, 7 January 1978

HOSHIKAWA, H. and SAITÔ, N., On the Chemical Reactions for Chemotaxis in Bacteria 1

SHAHINPOOR, M., The Role of Parametric Self-Excitation in DNA Self-Replication 17

MATSUNO, K., Evolution of Dissipative System: A Theoretical Basis of Margalef's Principle on Ecosystem 23

MIKHALTSEV, I. E., On the Physics of CNS Memory 33

LAXTON, R. R., The Measure of Diversity 51

POLTEV, V. I. and BRUSKOV, V. I., On Molecular Mechanisms of Nucleic Acid Synthesis Fidelity Aspects. 1. Contribution of Base Interactions 69

BISHOP, D. T. and CANNINGS, C., A Generalized War of Attrition . 85

GREENSPAN, H. P., On Fluid–Mechanical Simulations of Cell Division and Movement 125

Number 2, 21 January 1978

BARDSLEY, W. G. and WAIGHT, R. D., The Determination of Positive and Negative Co-operativity with Allosteric Enzymes and the Interpretation of Sigmoid Curves and Non-linear Double Reciprocal Plots for the MWC and KNF Models 135

WESTHAUS, P. A. and POHL, H. A., Hydrogen Bonds and Masking in the Sulfhydryl Group in Proteins 157

DOYLE, G. G., A General Theory of Chromosome Pairing Based on the Palindromic DNA Model of Sobell with Modifications and Amplifications 171

SKAGEN, D. W. and MØRKRID, L., An Approach to the Theory of Quantitative and Double Label Autoradiography . . . 185

HASSTEDT, S., A Stochastic Model for a Closed Biochemical System at Equilibrium 199

SLATKIN, M., Spatial Patterns in the Distributions of Polygenic Characters 213

LUNDSTRÖM, I. and STENBERG, M., Electrostatic Interaction between Gating Charges in Nerve Membranes 229

LETTERS TO THE EDITOR

ESHEL, I., On the Handicap Principle—A Critical Defence . . 245

MAYNARD SMITH, J., The Handicap Principle—A Comment . . 251

Number 3, 7 February 1978

IMAI, H. T. and MARUYAMA, T., Karyotype Evolution by Pericentric Inversion as a Stochastic Process 253

TANSKY, M., Switching Effect in Prey–Predator System . . . 263

LACALLI, T. C. and HARRISON, L. G., The Regulatory Capacity of Turing's Model for Morphogenesis with Application to Slime Moulds 273

DAAN, S. and BERDE, C., Two Coupled Oscillators: Simulations of the Circadian Pacemaker in Mammalian Activity Rhythms . . 297

SHINDLER, J. S. and TIPTON, K. F., A Quantitative Plot for the Determination of Negatively Co-operative Ligand Binding Sites in Proteins 315

EDWARDS, P. A. W., Sequence-Independent, Four-stranded, Double Watson–Crick DNA Helix that Could Solve the Unwinding Problem of Double Helices 323

FOX, J. L., A Model for Transhydrogenase 335

Number 4, 21 February 1978

TESTA, B., BÜNZLI, J.-C. and PURCELL, W. P., Regioelectronic Factors in Metabolic Hydroxylation of Aliphatic Carbon Atoms . . 339

BLANQUET, P. R., Unifying Heuristic Model of Transmembrane Coordinate Control for Cell Growth and Cell Movement . . 345

HELLER, R., Two Predator–Prey Difference Equations Considering Delayed Population Growth and Starvation 401

NYHOLM, N., Dynamics of Phosphate Limited Algal Growth: Simulation of Phosphate Shocks 415

PEDLEY, T. J. and FISCHBARG, J., The Development of Osmotic Flow Through an Unstirred Layer 427

MACNAIR, M. R., An ESS for the Sex Ratio in Animals, with Particular Reference to the Social Hymenoptera 449

LETTERS TO THE EDITOR

RAKITZIS, E. T., Kinetics of Irreversible Enzyme Inhibition: The Tsou Plot in Irreversible Binding Co-operativity . . 461

WALSH, J. B. and TUCKWELL, H. C., Repetitive Subthreshold Synaptic Excitation and Transmitter Depletion . . 467

Index to Volume 70

Algal growth: simulation of phosphate shocks, dynamics of phosphate limited, 415
Aliphatic carbon atoms, regioelectronic factors in metabolic hydroxylation of, 339
Allosteric enzymes and the interpretation of sigmoid curves and non-linear double reciprocal plots for the MWC and KNF models, the determination of positive and negative co-operativity, 135
Attrition, war of, a generalized, 85
Autoradiography, an approach to the theory of quantitative and double label, 185

Bacteria, chemotaxis in, on the chemical reactions for, 1
BARDSLEY, W. G. and WAIGHT, R. D., The determination of positive and negative co-operativity with allosteric enzymes and the interpretation of sigmoid curves and non-linear double reciprocal plots for MWC and KNF models, 135
BERDE, C. (see DAAN, S.), 297
Biochemical system, closed, at equilibrium, a stochastic model for, 199
BISHOP, D. T. and CANNINGS, C., A generalized war of attrition, 85
BLANQUET, P. R., Unifying heuristic model of transmembrane co-ordinate control for cell growths and cell movement, 345
BRUSKOV, V. I. (see POLTEV, V. I.), 69
BÜNZLI, J.-C. (see TESTA, B.), 339

CANNINGS, C. (see BISHOP, D. T.), 85
Cell division and movement, on fluid mechanical simulation of, 125
Cell growth and movement, unifying heuristic model of transmembrane co-ordinate control for, 345
Chemotaxis in bacteria, on the chemical reactions for, 1
CNS memory, the physics of, 33
Chromosome pairing based on the palindromic DNA model of Sobell with modifications and amplifications, a general theory of, 171

DAAN, S. and BERDE, C., Two coupled oscillators: simulations of the circadian pacemaker in mammalian activity rhythms, 297
Dissipative system, evolution of: a theoretical basis of Margalef's principle on ecosystem, 23
Diversity, measure of, 51
DNA helix that could solve the unwinding problem of double helices, sequence independent, four-stranded, double Watson-Crick, 323
DNA, palindromic, model of Sobell with modifications and amplifications, a general theory of chromosome pairing based on the, 171
DNA self-replication, the role of parametric self-excitation, 17
DOYLE, G. G., A general theory of chromosome pairing based on the palindromic DNA model of Sobell with modifications and amplifications, 171

EDWARDS, P. A. W., Sequence-independent, four-stranded, double Watson-Crick DNA helix that could solve the unwinding problem of double helices, 323
Enzyme inhibition, irreversible: the Tsou plot in irreversible binding co-operatively, kinetics of (letter), 461
ESHEL, I., On the handicap principle—a critical defence (letter), 245
ESS for the sex ratio in animals with particular reference to the social hymenoptera, 449

Evolution, karyotype, by pericentric inversion of a stochastic process, 253

FISCHBARG, J. (see PEDLEY, T. J.), 427
FOX, J. L., A model for transhydrogenase, 353

GREENSPAN, H. P., On fluid-mechanical simulations of cell divisions and movement, 125

Handicap principle—a critical defence (letter), 245
Handicap principle—a comment (letter), 251
HARRISON, L. G. (see LACALLI, T. C.), 273
HASSTEDT, S., A stochastic model for a closed biochemical system at equilibrium, 199
HELLER, R., Two predator-prey difference equations considering delayed population growth and starvation, 401
HOSHIKAWA, H. and SAITÔ, N., On the chemical reactions for chemotaxis in bacteria, 1
Hymenoptera (social), on ESS for the sex ratio in animals with particular reference to, 449
Hydrogen bonds and masking in sulfhydryl group in proteins, 157

IMAI, H. T. and MARUYAMA, T., Karyotype evolution by pericentric inversion as a stochastic process, 253

LACALLI, T. C. and HARRISON, L. G., The regulatory capacity of Turing's model for morphogenesis with application to slime moulds, 273
LAXTON, R. R., The measure of diversity, 51
LUNDSTRÖM, I. and STENBERG, M., Electrostatic interaction between gating charges in nerve membranes, 229

MACNAIR, M. R., An ESS for the sex ratio in animals with particular reference to the social hymenoptera, 449
Mammalian activity rhythms, two coupled oscillators: simulations of the circadian pacemaker, 297
Margalef's principle on ecosystem, a theoretical basis of, evolution of dissipative system, 23
MARUYAMA, T. (see IMAI, H. T.), 253
MATSUNO, K., Evolution of dissipative system: a theoretical basis of Margalef's principle on ecosystem, 23
MAYNARD SMITH, J., The handicap principle—a comment (letter), 251
MIKHALTSEV, I. E., On the physics of CNS memory, 33
MØRKRID, L. (see SKAGEN, D. W.), 185
Morphogenesis with application to slime moulds, the regulatory capacity of Turing's model for, 273

Nerve membranes, electrostatic interaction between gating charges in, 229
Nucleic acid synthesis fidelity aspects. 1. Contribution of base interactions, on molecular mechanisms of, 69
NYHOLM, N., Dynamics of phosphate limited algal growth: simulation of phosphate shocks, 415

Osmotic flow through an unstirred layer, the development of, 427

Pacemaker, circadian, in mammalian activity rhythms, two coupled oscillators: simulations of the, 297
Parametric self-excitation in DNA self-replication, the role of, 17
PEDLEY, T. J. and FISCHBARG, J., The development of osmotic flow through an unstirred layer, 427
Phosphate limited algal growth: simulation of phosphate shocks, dynamics of, 415
POHL, H. A. (see WESTHAUS, P. A.), 157
POLTEV, V. I. and BRUSKOV, V. I., On the molecular mechanisms of nucleic acid synthesis fidelity aspects. I. Contribution of base interactions, 69
Polygenic characters, spatial patterns in the distributions of, 213
Population growth and starvation, two predator-prey equations considering delayed, 401
Predator-prey difference equations considering delayed population growth and starvation, 401
Prey-predator system, switching effect in, 263
Proteins, hydrogen bonds and masking in the sulfhydryl group in, 157
Proteins, a quantitative plot for the determination of negatively co-operative legend binding sites in, 315
PURCELL, W. P. (see TESTA, B.), 339

RAKITZIS, E. T., Kinetics of irreversible enzyme inhibition: the Tsou plot in irreversible binding co-operativity (letter), 461

SAITÔ, N. (see HOSHIKAWA, H.), 1
Sex ratio in animals with particular reference to the social hymenoptera, an ESS, 449
SHAHINPOOR, M., The role of parametric self-excitation in DNA self replication, 17
SHINDLER, J. S. and TIPTON, K. F., A quantitative plot for the determination of negatively co-operative ligand binding sites in proteins, 315
SKAGEN, D. W. and MØRKRID, L., An approach to the theory of quantitative and double label autoradiography, 185
SLATKIN, M., Spatial patterns in the distributions of polygenic characters, 213
Slime moulds, the regulatory capacity of Turing's model for morphogenesis with application to, 273
STENBERG, M. (see LUNDSTROM, I.), 229
Synaptic excitation and transmitter depletion, repetitive subthreshold (letter), 467

TANSKY, M., Switching effect in prey–predator system, 263
TESTA, B., BÜNZLI, J.-C. and PURCELL, W. P., Regioelectronic factors in metabolic hydroxylation of aliphatic carbon atoms, 339
TIPTON, K. F. (see SHINDLER, J. S.), 315
Transhydrogenase, a model for, 335
Transmembrane co-ordinate control for cell growth and all movement, unifying heuristic model of, 345
Tsou plot in irreversible binding co-operativity, kinetics of irreversible enzyme inhibition (letter), 461
TUCKWELL, H. C. (see WALSH, J. B.), 467

WAIGHT, R. D. (see BARDSLEY, W. G.), 135
WALSH, J. B. and TUCKWELL, H. C., Repetitive subthreshold synaptic excitation and transmitter depletion (letter), 467
War of attrition, a generalized, 85
WESTHAUS, P. A. and POHL, H. A., Hydrogen bonds and masking in sulfhydryl group in proteins, 157
